Description

CORIA 2008 is the fifth Francophone Conference on Information Retrieval and Applications. Organized with the support of the ARIA (French Association for IR) CORIA is the main forum for the Francophone community in information retrieval. It is widely open to the entire scientific community concerned with this domain.

The conference gives to the participants the opportunity to exchange new ideas and to present new theoretical and empirical results in IR and in related domains. IR has known unprecedented developments, particularly with the growth of web-related applications. Many new promising directions have recently emerged like web retrieval, Web2.0 applications, social networks, blog search, forums and community sites, large graph analysis, rumor detection, sentiment classification, etc.

The targeted audience for CORIA 2008 is that of junior and confirmed researchers conducting their research in the field of Information Retrieval or related fields, in France and in French-speaking countries such as North Africa countries, Switzerland, Belgium or Canada.

Topics

We are seeking the submission of research papers that have not been previously published or submitted. Submissions will be reviewed by experts on the basis of their originality, their methodology and the validity of results. Papers that explore new and original IR related directions are particularly welcome even if not the main stream of past IR research. Topics of interest include, but are not limited to:

- Theory and Formal Models for IR: Logic and Language Models, Probabilistic Models.
- Cross Language and Multi Language Retrieval, Translation.
- Multimedia Retrieval.
- Machine learning, Classification, Clustering, Ranking, Filtering, Spam Detection, Topic Detection.
- Natural Language Processing, Question Answering, Information Extraction, Summarization, Lexical Acquisition.
- Web IR, Large scale IR, Large Graphs Analysis, Citations and Link Analysis.
- Social Networks, Blog Search, Communities, Sentiment Classification, Rumor Detection, Adversarial IR.
- Collaborative IR, Recommender Systems
- User interaction, User Modeling, Interfaces, Visualization.
- Knowledge Representation, Metadata, Ontology, Semantic Web, Knowledge Engineering.
- Electronic Libraries, specialized IR.
- Distributed IR, P2P.
- Evaluation and Test Collections
- Query Languages

Instructions for Authors

Summaries and **papers** are respectively due for **December 3, 2007** and **December 10, 2007**. Submission may be in French or in English.

Papers, 16 pages at most, may be written in Word or Latex. The format can be downloaded at http://www.hermes-science.fr/fr/cons_revues.html. A cover page is required with the title, the name and affiliation of authors, a summary of at most 10 lines, a list of keywords.

Only PDF is allowed for submission. The submission site is <http://www.easychair.org/CORIA-2008/>
